

Monitoring of Waste Emission.

An inventory of purchased tonnes of materials and waste by product from the installation as given in section B2.4 and B2.5 will be recorded to enable the annual report to be prepared.

Reporting Arrangements

The company will submit an annual report to the Local Authority (by the end of January each year) containing a summary of the results of all monitoring undertaken during the previous year

- (A) Air emissions data, including a summary of monitoring results by subcontracted Consultants giving annual emission monitoring or continuous particulate monitoring equipment operated at the site along with weekly visual inspection. A log containing all raw data will be held on the site.
- (B) Waste emission data a quantified inventory of the waste removed to land fill or used by third parties.
